# Architectural Metal Wall & Roof Systems

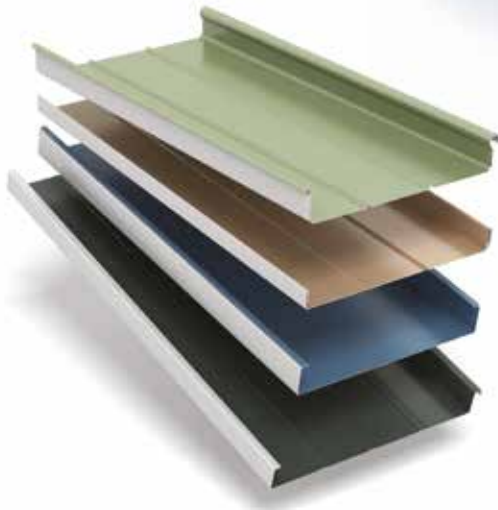

## Innovative Single Element Envelope Solutions

### Metal Wall Systems

Morin wall systems are architectural, heavier gauge, single element wall systems.

With over 30 unique profiles including Matrix, Integrity and Pulse panels that all have interlocking joints and can be easily integrated, the design options are endless.

### Metal Roof Systems

A vast range of profiles offering straight, tapered and mechanically curved solutions, all combined with unrivaled color, texture and material options.

All Morin roofing panel systems are available in a variety of sizes, finishes, ribs and other options. We can custom design your system to meet your exact project needs.

### Beyond Just Panels

We offer a vast array of design options to really bring your design ideas to life.

We can provide a complete, finished, custom fabricated look, from curved or mitered corners, extrusions, foam closures and custom cut components to perforations and color matched fasteners.

### Technical Support

Morin has technical support available from start to finish.

We are there to help you through every phase of building from technical CAD support to on-site installation. Our staff can help with drawings, design, cost-effective construction application and technical designs for complicated projects.

Achieve LEED Certification while designing with over 30 integrated panels with Morin.
