

ENSURING CONTINUOUS POWER

Service & Support Solutions

Totally Integrated Fuel Management Solutions

www.kingspanservice.com/fuelmanagement

Ensuring safe clean and intelligent storage for your fuel

Are you a business reliant on stand-by power?

Contaminated fuel can stop even the most advanced back-up generators, Our Fuel Management Solutions can help you maintain ongoing site resilience against fuel failure helping reduce the risks of long-term storage.

Site surveys conducted by our fuel specialists have found that nearly 80% of fuel tanks tested revealed a level of contamination deemed 'at risk' of affecting uninterrupted power. We understand the importance of maintaining the correct fuel specification to keep your business moving. Through our pro-active maintenance solutions we can assist in putting together your critical Fuel Management Plan.

Providing specialist fuel management services for the follow sectors:

- Hospitals
- Financial Institutions
- Data Centres

Benefits of having a Fuel Management Plan

Security/Peace Of Mind

That when power is required the generator will not fail because of poor fuel or faulty parts

Reduced Costs

Maintenance costs reduced to the engine on the generator - as faults caused by bad fuel will be eliminated, less injector and fuel pump repairs.

Saves Money

No need to dispose of bad fuel and replacing with new fuel.

Improved Efficiency

The engine on the generator will run cleaner and more economically with clean fuel.

Environmental Benefits

Less emissions from the engines due to cleaner fuel.

Compliance/Reduced Risk

Ensure that your tanks and management of the tanks meet current regulatory requirements.

ISO 44 06/EN590 Standards

Kingspan's Fully Managed Effective Fuel Management Services

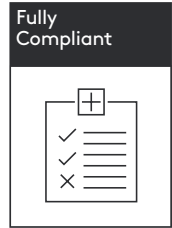

Site Assessment

Our Fuel Specialists conduct complete fuel resilience surveys assessing compliance and includes full laboratory analysis to identify any contaminants present.

Preserving the reliability of critical power

On average
one minute of
downtime costs
a company
£5224

What would a power failure
cost your business?

Customised & Fully Integrated Fuel Storage Solutions

Our diverse range of Innovative steel and plastic storage solutions are available from 200 – 150,000 litres, with a unique choice of dispensing and management systems for all applications.

Fuel Polishing & Tank Cleaning

Over time all stored fuel will deteriorate and can cause sludge, debris and water to build up. Treatment of fuel increases its useful life ensuring it is fit for purpose.

Intelligent Monitoring & Fuel Management

Through our innovative devices installed onto your tanks – Kingspan Sensor provides in-depth data that gives you total visibility and control of your tank levels – anytime, anywhere.

24hr Service & Maintenance

To ensure that your tanks mechanical & electrical components are working effectively we recommend these are checked as part of your Fuel Management Plan

Full Support

We offer all our customers helpful, friendly and professional support 24/7/365 from the moment you contact us. Our highly skilled and knowledgeable advisors are fully committed to giving you excellent customer service.

Hassle Free

Our expertise and knowledge assures your project goes as smoothly as possible. We take pride in treating our customers with respect- from start to finish giving you the peace of mind that you are in safe hands.

Trust

As the sustainable energy and water management solution experts, you can trust our dedicated aftercare teams to provide you with professional constant support and maintenance.
