---

**MONITOR YOUR  
OIL HEATING LEVELS  
AND NEVER RUN OUT**

---

Monitor your oil heating levels from the comfort of your own home, giving you peace of mind that you won't run out.

# The WatchmanSonic electronic measuring gauge

## Features

- One model fits all
- Quick and easy to install
- Suitable for steel or plastic tanks
- 12 months replacement guarantee
- Low power consumption
- 200 metre transmitter to receiver range
- Measures tanks up to 3 metres in height
- Option of audible setting sending out a buzzing tone when oil levels run out

## How does it work?

- 1** The transmitter sits on top of the tank and using ultrasonic level measurement techniques, constantly measures the level of oil in the tank.
- 2** It then transmits that information to the receiver which is plugged into an electric wall socket, located in a convenient place within the house.
- 3** The height of the liquid is displayed on a LCD screen on the receiver. The householder can monitor the level of oil in their tank from inside their home.
- 4** When the level of oil in the tank gets below 10%, the fuel dispensing pump symbol appears, indicating to the householder that it is time to order some more oil.
