# ROAD BARRIER

ROAD BARRIERS BY TITAN ALLOW QUICK AND EASY  
HORIZONTAL LABELING OF CHANGES  
AND REDIRECTS ON THE LANE

## BENEFITS

- › Durability – strong and rigid construction, top quality polyethylene and modern technology make the road safety barriers extremely resistant to mechanical damage and changeable weather conditions. UV stabilized, they will not fade in the sun. Having no metal components, the barriers are light, yet durable. Individual units can be connected together to form chains of any length using built-in catches.
- › Colour – standard road barriers are available in white and red.
- › Safety and hygiene – the road barrier is a single moulded component without any moving parts. A chain consisting of several linked units is a rigid, impact resistant construction usable in any weather conditions. Chains can be constructed to follow bends and curves as necessary. This allows for optimum and safe protection of the area.
- › Convenience – due to the low weight of barriers they are easy to transport.
- › Warranty – All road barriers are covered by a five year warranty. The warranty applies to the product used in accordance with the manufacturer's recommendations.

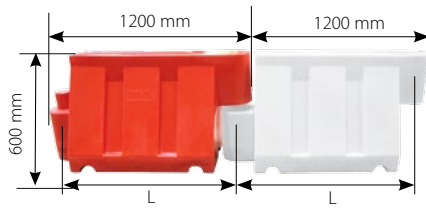

## AVAILABLE DIMENSIONS

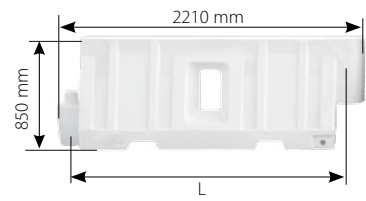

**PRODUCT CODE**  
TRB01000\*

**Length** 1,21 m  
**Width** 0,40 m  
**Height** 0,81 m  
**Length L\*\*** 1,10 m

**PRODUCT CODE**  
TRB01000\*\_LO

**Length** 1,20 m  
**Width** 0,50 m  
**Height** 0,60 m  
**Length L\*\*** 1,00 m

**PRODUCT CODE**  
TRB02000\*

**Length** 2,21 m  
**Width** 0,50 m  
**Height** 0,85 m  
**Length L\*\*** 2,00 m

Product dimensions may vary within +/-1%.

\* The code ending depends on the product colour: SW - white, RE - red.

\*\* The linking distance is not equal to the overall length of the barrier. Only road barriers of the same type may be connected together.

The exact hues of the colours presented in the flyers may differ, depending on the quality of print.  
Product specifications may be slightly modified; to obtain an up-to-date equipment specification, contact the office or the nearest distributor.
